

APPROACH TO BE TAKEN BEFORE HAVING A P.R.T. PROVIDE TREATMENT TO A PATIENT

1

Determine if the **PREREQUISITES** have been met

2

Determine the **CATEGORY** of the patient's impairment

CATEGORY 1	CATEGORY 2	CATEGORY 3	CATEGORY 4
Patient suffering from an impairment for which an established loss of autonomy or sequelae require rehabilitation to maintain a level of autonomy or recover functional autonomy.	Patient with an orthopedic or rheumatic disorder that does not interfere with normal growth.	Patient with: <ul style="list-style-type: none"> a) an orthopedic or rheumatic disorder that interferes with normal growth; b) a neurological disorder affecting an adult with no intensive period of functional rehabilitation or for which the intensive period of functional rehabilitation has ended; c) a chronic and controlled respiratory disorder; d) a peripheral vascular disorder; e) a skin disorder, pressure ulcer or burns, except a serious burn; f) a geriatric profile the condition of which requires an investigation. 	Patient with a disorder or condition other than those provided for in paragraph 1, 2 or 3.

3

Identify, depending on the impairment disorder, the **ADDITIONAL INFORMATION** required and determine if it has been provided

None	List of problems	List of problems, treatment objectives and contraindications or precautions	List of problems, treatment objectives, contraindications or precautions and means of treatment
------	------------------	---	---

4

Take into account the **RESPONSIBILITIES OF THE PROFESSIONALS** involved

<p>P.R.T. Determine the list of problems, treatment objectives and contraindications or precautions, make decisions regarding the means of treatment and provide the treatment.</p> <p>REFERRING PROFESSIONAL Provide the prerequisites.</p>	<p>P.R.T. Contribute to the development of the list of problems, determine treatment objectives and contraindications or precautions, make decisions regarding the means of treatment and provide the treatment.</p> <p>REFERRING PROFESSIONAL Provide the prerequisites and determine the list of problems</p>	<p>P.R.T. Make decisions regarding the means of treatment and provide the treatment.</p> <p>REFERRING PROFESSIONAL Provide the prerequisites, determine the list of problems, treatment objectives and contraindications or precautions.</p>	<p>P.R.T. Apply the means of treatment prescribed by the referring professional.</p> <p>REFERRING PROFESSIONAL Provide the prerequisites, determine the list of problems, treatment objectives and contraindications or precautions and means of treatment.</p>
